NOTICE

The Industry and Merchandising Division of the Bureau of Statistics collects and compiles figures on (a) the primary industries in Canada—mining, forestry and fishing; (b) manufacturing; (c) construction; and (d) merchandising and services.

For the purpose of annual compilation and publication, the manufacturing industries have been classified into major groups, prefaced by two reports of a general nature, as follows:

- I Summary report on manufacturing industries
- II The manufacturing industries of Canada, by provinces
- III Foods and beverages
- IV Tobacco and tobacco products
- V Rubber products
- VI Leather products
- VII Miscellaneous manufactures
- VIII Textiles
- IX Wood and paper products
- X Printing trades
- XI Operations in the woods
- XII Iron and steel products
- XIII Transportation equipment
- XIV Non-ferrous metal products
- XV Electrical apparatus and supplies
- XVI Non-metallic mineral products
- XVII Products of petroleum and coal
- XVIII Chemicals and allied products

The present report belongs in Group II. It is punched to permit filing in a ring binder along with other reports of the group, the full list of which is as follows:

Section I. Principal statistics of major industrial groups and leading industries.

Section II. Principal statistics of the individual industries.

Section III. Principal statistics by regional distribution.

AVIS

La Division de l'industrie et du commerce du Bureau fédéral de la statistique réunit et analyse les chiffres sur (a) les industries primaires du Canada—mines, forêts et pêche; (b) l'industrie manufacturière (c) la construction; et (d) le commerce et les services.

Pour les besoins de l'analyse et de la publication annuelles, les industries manufacturières ont été divisées en grands groupes précédés de deux rapports d'un caractère général:

- I Rapport sommaire sur les industries manufacturières
- II Industries manufacturières du Canada, par provinces
- III Aliments et boissons
- IV Tabac et produits du tabac
- V Produits du caoutchouc
- VI Produits du cuir
- VII Industries manufacturières diverses
- VIII Textiles
- IX Produits du bois et du papier
- X Métiers de l'imprimerie
- XI Opérations en forêt
- XII Produits du fer et de l'acier
- XIII Equipement de transport
- XIV Produits de métaux non ferreux
- XV Appareils et fournitures électriques
- XVI Produits des minéraux non métalliques
- XVII Dérivés du pétrole et du charbon
- XVIII Produits chimiques

Le présent rapport fait partie du groupe II. Il est perforé de façon qu'on puisse l'insérer dans un relieur à anneaux avec les autres rapports du groupe, dont voici la liste complète:

Section I. Principales statistiques des grands groupes d'industries et des industries les plus importantes.

Section II. Principales statistiques de chaque industrie.

Section III. Principales statistiques, distribution régionale.

THE MANUFACTURING INDUSTRIES OF CANADA, BY PROVINCES, 1950

LES INDUSTRIES MANUFACTURIÈRES DU CANADA, PAR PROVINCES, 1950

The manufacturing industries of Canada in 1950 again established a new record in gross value of production with a total of \$13,817,526,381. This represents an increase of 10.7 p.c. over the previous year's value of production. Part of the increased value was accounted for by an increase of about 7 p.c. in the physical volume of production and the balance by increased prices of fully and partly manufactured products. Accompanying the rise in output was an increase of 1.0 p.c. in the number of persons employed, with an increase of 6.9 p.c. in the salaries and wages paid. Salary and wage payments at \$2,771,267,435 were the highest on record, and exceeded the previous high reported in 1949 by \$179,376,778.

Manufacturing activity during 1950 had not been affected to any great extent by the outbreak of hostilities in Korea. The figures, at any rate, do not reveal any marked trend from the peace-time production of the previous few years. The rubber goods; electrical apparatus; non-metallic mineral products; and products of petroleum and coal groups were the only ones to report substantially increased production over the previous year. Even for these industries not the whole of the increase can be attributed to the demands created by the decision of Canada to join the United Nations in the Korean War.

From the point of view of employment which more closely reflects changes in the physical volume of production than any other factor, the electrical apparatus group with an increase of 7.8 per cent reported the greatest increase in production. The rubber and non-metallic mineral products groups came second with 5.2 per cent; followed by products of petroleum and coal 4.3 per cent, wood products 3.7 per cent, textile products (except clothing) 3.3 per cent, miscellaneous industries 3.1 per cent, printing, publishing and allied trades 2.1 per cent, paper products 1.4 per cent, iron and steel products .6 per cent, and chemical products .4 per cent. Non-ferrous metal products showed only a slight change. The greatest decline was reported by the leather products group with 5.5 per cent; followed by tobacco products with 3.4 per cent; food and beverages 1.5 per cent; clothing (textile and fur) 1.3 per cent; and transportation equipment .5 per cent.

Manufacturing establishments reporting in 1950 numbered 35,942. Of these 850 were located in Newfoundland, 244 in Prince Edward Island, 1,482 in Nova Scotia, 1,107 in New Brunswick, 11,670 in Quebec, 12,809 in Ontario, 1,507 in Manitoba, 887 in Saskatchewan, 1,671 in Alberta, 3,696 in British Columbia and 19 in Yukon and Northwest Territories. These plants furnished employment to 1,183,297 persons who received \$2,771,267,435 in salaries and wages. They also produced goods with a selling value at the factory of \$13,817,526,381 and spent \$7,538,534,532 for materials, while the value added by manufacture totalled \$5,942,058,229. It should be remembered that the value added by manufacture does not represent the manufacturers' profits. The value added is obtained by subtracting the cost of materials, including fuel and electricity, from the value of products. The difference represents the value added to the materials by labour. It is this difference which the employer of labour uses to pay for the labour itself, the overhead expenses, interest and profits. Compared with the previous year, there was an increase of \$611,491,795 in the value added by manufacture.

Les industries manufacturières du Canada, en 1950, ont touché de nouveaux sommets quant à la valeur brute de la production. Celle-ci s'établit, au total, à \$13,817,526,381, ce qui représente une augmentation de 10.7 p. 100 sur le chiffre de l'année précédente. Une partie de cette augmentation est attribuable à l'augmentation d'environ 7 p. 100 du volume physique de la production et le reste, à la hausse des produits entièrement et partiellement fabriqués. En même temps que la production, le nombre de personnes employées dans ces industries augmente de 1.0 p. 100 et les salaires et gages payés, de 6.9 p. 100. La somme des salaires et gages, \$2,771,267,435, est la plus élevée de l'histoire et surpasse de \$179,376,778, le sommet antérieur atteint en 1949.

Les hostilités en Corée n'ont pas modifié sensiblement l'activité manufacturière en 1950. De toute façon, les chiffres n'accusent aucune tendance particulière comparativement à la production de temps de paix des quelques années précédentes. Les articles en caoutchouc, les appareils électriques, les produits des non-métalliques, de même que les groupes des dérivés du pétrole et du charbon sont les seuls à enregistrer des augmentations importantes au regard de l'année précédente, et même dans ces dernières industries, l'augmentation entière ne saurait être attribuée à la demande créée par la décision du Canada de se joindre aux Nations-Unies dans la guerre de Corée.

Du point de vue de l'emploi, qui, plus que tout autre facteur, reflète fidèlement les changements qui se produisent dans le volume physique de la production, c'est le groupe des appareils électriques, avec un gain de 7.8 p. 100, qui accuse l'augmentation la plus marquée de la production. Les articles en caoutchouc et les produits des non-métalliques viennent ensuite avec une augmentation de 5.2 p. 100. Ils sont suivis des dérivés du pétrole et du charbon, avec 4.3 p. 100; des produits du bois, avec 3.7 p. 100; des produits textiles (sauf le vêtement), avec 3.3 p. 100; des industries diverses, avec 3.1 p. 100; de l'impression et de l'édition et des industries connexes, avec 2.1 p. 100; des produits du papier, avec 1.4 p. 100; des produits du fer et de l'acier, avec .6 p. 100; et des produits chimiques, avec .4 p. 100. Les produits des métaux non ferreux ne changent que légèrement. La diminution la plus sensible est celle des articles en cuir, 5.5 p. 100, suivis des produits du tabac, avec 3.4 p. 100; des aliments et boissons, avec 1.5 p. 100; des vêtements (en tissus et en fourrure), avec 1.3 p. 100; et de l'équipement de transport, avec .5 p. 100.

Les établissements manufacturiers qui font rapport en 1950 sont au nombre de 35,942, dont 850 sont situés à Terre-Neuve, 244, dans l'île du Prince-Édouard, 1,482 en Nouvelle-Écosse, 1,107 au Nouveau-Brunswick, 11,670 dans Québec, 12,809 en Ontario, 1,507 au Manitoba, 887 en Saskatchewan, 1,671 en Alberta, 3,696 en Colombie-Britannique et 19 au Yukon et dans les Territoires du Nord-Ouest. Ces établissements procurent de l'emploi à 1,183,297 personnes qui reçoivent en salaires et gages la somme de \$2,771,267,435. Ils produisent aussi pour une valeur marchande à la fabrique de \$13,817,526,381 et dépensent en matières premières une somme de \$7,538,534,532, tandis que la valeur ajoutée par la fabrication s'élève à \$5,942,058,229 au total. Il convient de remarquer que la valeur ajoutée par la fabrication ne représente pas les bénéfices des manufacturiers. On obtient cette valeur ajoutée en soustrayant le coût des matières premières, y compris le combustible et l'électricité, de la valeur des produits. La différence représente la valeur ajoutée aux matières premières par la main-d'œuvre, et c'est avec cette différence que l'employeur paye sa main-d'œuvre, ses frais généraux et ses intérêts et s'attribue des bénéfices. Au regard de l'année précédente, la valeur ajoutée par la fabrication augmente de \$611,491,795.

1. A change in the method of computing the number of wage-earners in the years 1925 to 1930 increased the number somewhat over that which the method otherwise used would have given. In 1931, however, the method in force prior to 1925 was re-adopted. The figures for 1931 and later years are, therefore, comparable with those for 1924 and earlier years. — Vu la modification apportée à la méthode de calcul de 1925 à 1930 le nombre d'employés à gages est plus élevé qu'il ne l'aurait été si l'on s'était servi de l'ancienne méthode. En 1931, toutefois, la méthode antérieure à 1925 a été réadoptée. Les chiffres de 1931 et des années suivantes sont donc comparables avec ceux de 1924 et des années précédentes.

2. In accordance with a resolution passed by the Conference of British Commonwealth Statisticians, 1935, the net value of production is now computed by subtracting the cost of fuel and electricity as well as the cost of materials from the gross value of the products. The figures for 1924 and later years have, therefore, been revised in accordance with this resolution. The revision could not be carried farther back as statistics for the cost of electricity are not available for years prior to 1924. — En vertu d'une résolution adoptée à la conférence des Statisticiens du Commonwealth Britannique, en 1935, la valeur nette de production est maintenant calculée en soustrayant le coût des matières premières, plus le combustible et l'électricité de la valeur brute des produits. Les chiffres de 1924 et des années postérieures ont donc été révisés conformément à cette résolution. Les calculs ne peuvent remonter plus haut que 1924, les statistiques du coût de l'électricité n'existant pas antérieurement à cette date.

3. Includes Newfoundland with the exception of fish processing. — Comprend Terre-Neuve, à l'exclusion du conditionnement du poisson.

NOTICE

The Industry and Merchandising Division of the Bureau of Statistics collects and compiles figures on (a) the primary industries in Canada—mining, forestry and fishing; (b) manufacturing; (c) construction; and (d) merchandising and services.

For the purpose of annual compilation and publication, the manufacturing industries have been classified into major groups, prefaced by two reports of a general nature, as follows:

- I Summary report on manufacturing industries
- II The manufacturing industries of Canada, by provinces
- III Foods and beverages
- IV Tobacco and tobacco products
- V Rubber products
- VI Leather products
- VII Miscellaneous manufactures
- VIII Textiles
- IX Wood and paper products
- X Printing trades
- XI Operations in the woods
- XII Iron and steel products
- XIII Transportation equipment
- XIV Non-ferrous metal products
- XV Electrical apparatus and supplies
- XVI Non-metallic mineral products
- XVII Products of petroleum and coal
- XVIII Chemicals and allied products

The present report belongs in Group II. It is punched to permit filing in a ring binder along with other reports of the group, the full list of which is as follows:

Section I. Principal statistics of major industrial groups and leading industries.

Section II. Principal statistics of the individual industries.

Section III. Principal statistics by regional distribution.

AVIS

La Division de l'industrie et du commerce du Bureau fédéral de la statistique réunit et analyse les chiffres sur (a) les industries primaires du Canada—mines, forêts et pêche; (b) l'industrie manufacturière; (c) la construction; et (d) le commerce et les services.

Pour les besoins de l'analyse et de la publication annuelles, les industries manufacturières ont été divisées en grands groupes précédés de deux rapports d'un caractère général:

- I Rapport sommaire sur les industries manufacturières
- II Industries manufacturières du Canada, par provinces
- III Aliments et boissons
- IV Tabac et produits du tabac
- V Produits du caoutchouc
- VI Produits du cuir
- VII Industries manufacturières diverses
- VIII Textiles
- IX Produits du bois et du papier
- X Métiers de l'imprimerie
- XI Opérations en forêt
- XII Produits du fer et de l'acier
- XIII Équipement de transport
- XIV Produits de métaux non ferreux
- XV Appareils et fournitures électriques
- XVI Produits des minéraux non métalliques
- XVII Dérivés du pétrole et du charbon
- XVIII Produits chimiques

Le présent rapport fait partie du groupe II. Il est perforé de façon qu'on puisse l'insérer dans un relieur à anneaux avec les autres rapports du groupe, dont voici la liste complète:

Section I. Principales statistiques des grands groupes d'industries et des industries les plus importantes.

Section II. Principales statistiques de chaque industrie.

Section III. Principales statistiques, distribution régionale.

FOREWORD

Two major changes were adopted in 1949 in the compilation of statistics of manufactures. First, the compilations contain for the first time statistics for Newfoundland, and second, there was also a change in the system of classifying industries. Under the Standard Classification adopted in 1949, the industries are grouped into seventeen major groups as listed below;

1. Foods and beverages
2. Tobacco and tobacco products
3. Rubber products
4. Leather products
5. Textile products (except clothing)
6. Clothing (textile and fur)
7. Wood products
8. Paper products
9. Printing, publishing and allied industries
10. Iron and steel products
11. Transportation equipment
12. Non-ferrous metal products
13. Electrical apparatus and supplies
14. Non-metallic mineral products
15. Products of petroleum and coal
16. Chemicals and allied products
17. Miscellaneous manufacturing industries

The nine groups formerly used, were:

1. Vegetable products
2. Animal products
3. Textiles and textile products
4. Wood and paper products
5. Iron and its products
6. Non-ferrous metal products
7. Non-metallic mineral products
8. Chemicals and allied products
9. Miscellaneous industries

Some industries were broken down such as the electrical apparatus and supplies industry which now comprises five industries (a) batteries (b) heavy electrical machinery, (c) radios and radio parts, (d) refrigerators, vacuum cleaners and appliances and (e) miscellaneous electrical products. In some cases establishments were transferred from one industry to another in order to bring them in line with the new industries which were established. Where an industry was eliminated the establishments were transferred to one or several other industries, depending on the nature of the principal products manufactured. A check was also made of each establishment and many transfers were made where the major products of the establishment had materially changed during the past few years. All this makes it practically impossible to evaluate industry changes historically.

AVANT-PROPOS

Deux changements importants ont été apportés à la méthode de calcul de la statistique manufacturière en 1949. D'abord, et pour la première fois, les calculs tiennent compte des chiffres de Terre-Neuve et ensuite la méthode de classification des industries a été modifiée. D'après la nouvelle classification adoptée en 1949, les industries sont réparties entre dix-sept groupes principaux, comme suit:

1. Aliments et boissons
2. Tabac et produits du tabac
- 3. Produits du caoutchouc
4. Produits du cuir
5. Textiles (vêtements exceptés)
6. Vêtements (textile et fourrure)
7. Produits du bois
8. Produits du papier
9. Impression, édition et industries connexes
10. Produits du fer et de l'acier
11. Équipement de transport
12. Produits des métaux non ferreux
13. Appareils et fournitures électriques
14. Produits des minéraux non métalliques
15. Dérivés du pétrole et du charbon
16. Produits chimiques
17. Industries manufacturières diverses

Les neuf groupes autrefois employés, sont:

1. Substances végétales
2. Produits animaux
3. Textiles et tissus
4. Bois et papier
5. Fer et ses produits
6. Métaux non ferreux
7. Métalloïdes
8. Produits chimiques
9. Industries diverses

Certaines industries ont été subdivisées; par exemple, l'industrie des appareils et des fournitures électriques comprend maintenant cinq industries: a) accumulateurs, b) machinerie électrique lourde, c) radios et pièces, d) réfrigérateurs, aspirateurs et autres articles électriques, et e) articles électriques divers. Il a fallu, dans certains cas, transporter les établissements d'une industrie à une autre afin qu'ils soient en harmonie avec les industries nouvelles. Là où une industrie a été éliminée, les établissements ont été transportés à une ou plusieurs autres, selon la nature du principal produit fabriqué. Chaque établissement a aussi été vérifié et plusieurs transferts ont été effectués là où les principaux produits de l'établissement ont changé sensiblement au cours des quelques dernières années. En raison de tous ces changements, il est à peu près impossible d'évaluer les transformations qui se sont produites dans l'industrie au point de vue chronologique.

NOTICE

The Industry and Merchandising Division of the Bureau of Statistics collects and compiles figures on (a) the primary industries in Canada — mining, forestry and fishing; (b) manufacturing; (c) construction; and (d) merchandising services.

For the purpose of annual compilation and publication, the manufacturing industries have been classified into major groups, prefaced by two reports of a general nature, as follows:

- I Summary Report on Manufacturing Industries
- II The Manufacturing Industries of Canada, by provinces
- III Food and Beverages
- IV Tobacco and Tobacco Products
- V Rubber Products
- VI Leather Products
- VII Miscellaneous Manufactures
- VIII Textiles
- IX Wood and Paper Products
- X Printing Trades
- XI Operations in the Woods
- XII Iron and Steel Products
- XIII Transportation Equipment
- XIV Non-ferrous Metal Products
- XV Electrical Apparatus and Supplies
- XVI Non-metallic Mineral Products
- XVII Products of Petroleum and Coal
- XVIII Chemicals and Allied Products

The present report belongs in Group II. It is punched to permit filing in a ring binder along with other reports of the group, the full list of which is as follows:

Section I. Principal statistics of major industrial groups and leading industries.

Section II. Principal statistics of the individual industries.

Section III. The manufacturing industries by geographical areas.

1. Not collected.

2. A change in the method of computing the number of wage-earners in the years 1925 to 1930, inclusive, increased the number somewhat over that which the method otherwise used would have given. In 1931, however, the method in force prior to 1925 was re-adopted. The figures for 1931 and later years are, therefore, comparable with those for 1924 and earlier years.

3. In accordance with a resolution passed by the Conference of British Commonwealth Statisticians, 1935, the net value of production is now computed by subtracting the cost of fuel and electricity as well as the cost of materials from the gross value of the products. The figures for 1924 and later years, have, therefore, been revised in accordance with this resolution. The revision could not be carried farther back as statistics for the cost of electricity are not available for years prior to 1924.

4. Includes Newfoundland.

NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 4 volumes as follows: Volume I—The Primary Industries, including mining, forestry and fishing; Volume II—Manufacturing; Volume III—Construction; Volume IV—Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups.

- I—General Review of the Manufacturing Industries, \$1.50.
- II—The Manufacturing Industries, by Provinces (3 Sections, see below).
- III—Foods and Beverages
- IV—Tobacco and Tobacco Products
- V—Rubber Products
- VI—Leather Products
- VII—Textiles
- VIII—Wood and Paper Products
- IX—Printing Trades
- X—Iron and Steel Products
- XI—Transportation Equipment
- XII—Non-ferrous Metal Products
- XIII—Electrical Apparatus and Supplies
- XIV—Non-metallic Mineral Products
- XV—Products of Petroleum and Coal
- XVI—Chemicals and Allied Products
- XVII—Miscellaneous Manufactures

The present report belongs in Part II. It is punched to permit filing in a ring binder along with other reports of the group, the full list of which is as follows:

- Section 1. Principal Statistics of Major Industrial Groups and Leading Industries, 50¢.
- Section 2. Principal Statistics of Individual Industries, 75¢.
- Section 3. Principal Statistics by Regional Distribution, 75¢.

AVIS

Les rapports annuels préparés par la Division de l'industrie et du commerce du Bureau fédéral de la statistique sont répartis en quatre volumes: Volume I—Industries primaires, y compris mines, forêts et pêche; Volume II—Manufactures. Volume III—Construction; Volume IV—Commerce et services. Les volumes contiennent plusieurs parties, qui sont, à leur tour, subdivisées selon les industries dont elles se composent.

Le Volume II contient les parties suivantes, dont les deux premières traitent des industries manufacturières dans l'ensemble et les autres, des principaux groupes d'industries manufacturières.

- I—Revue générale des industries manufacturières, \$1.50.
- II—Industries manufacturières, par province (3 Sections—voir ci-dessous).
- III—Aliments et boissons
- IV—Tabac et produits du tabac
- V—Produits du caoutchouc
- VI—Produits du cuir
- VII—Textiles
- VIII—Produits du bois et du papier
- IX—Métiers de l'imprimerie
- X—Dérivés du fer et de l'acier
- XI—Équipement de transport
- XII—Dérivés des métaux non ferreux
- XIII—Appareils et fournitures électriques
- XIV—Dérivés des non-métalliques
- XV—Produits du pétrole et du charbon
- XVI—Produits chimiques et parachimiques
- XVII—Industries manufacturières diverses

Le présent rapport tombe dans la partie II. Il est perforé de façon qu'on puisse l'insérer dans un relieur à anneaux avec les autres rapports du groupe, dont voici la liste complète:

- Section 1. Principales statistiques des grands groupes d'industries et des industries les plus importantes, 50¢.
- Section 2. Principales statistiques de chaque industrie, 75¢.
- Section 3. Statistiques principales selon la répartition régionale, 75¢.

THE MANUFACTURING INDUSTRIES OF CANADA, BY PROVINCES, 1951

LES INDUSTRIES MANUFACTURIÈRES DU CANADA, PAR PROVINCES, 1951

The manufacturing industries of Canada in 1951 again established a new record in gross value of production with a total of \$16,392,187,132. This represents an increase of 18.6 p.c. over the previous year's value. Part of the increased value was accounted for by an increase of about 6 p.c. in the physical volume of production and the balance by increased prices of fully and partly manufactured products. Accompanying the rise in output was an increase of 6.3 p.c. in the number of persons employed, with an increase of 18.2 p.c. in the salaries and wages paid. Salary and wage payments at \$3,276,280,917 were the highest on record, and exceeded the previous high reported in 1950 by \$505,013,482.

Not all segments of manufacturing production were affected to the same degree by the impact of the war in Korea. The greatest expansion was reported by the industries classified in the durable goods group which according to preliminary estimates achieved an increase of 10.4 p.c. in the physical volume of production, as compared with an increase of only 2.7 p.c. for the industries producing non-durable goods. For manufacturing as a whole the increase was 6.1 p.c.; the index at 242.1 being only .2 points below the record wartime level attained in 1944.

As was to be expected, the industries producing for national defense made the greatest gains in production during 1951. Accordingly most of the industry groups producing durable goods reported increased activity, while of the industry groups producing consumer goods only a few reported increases in production, the majority reporting declines. The transportation equipment group with an increase of 20 p.c. in physical volume experienced the greatest expansion in production. This was followed by products of petroleum and coal with 13 p.c., iron and steel products 11 p.c., non-ferrous metal products 10 p.c., non-metallic mineral products 9 p.c., paper products 8 p.c., electrical apparatus and supplies 7 p.c., chemicals and allied products 6 p.c., rubber products 5 p.c., foods and beverages 4 p.c., wood products 3 p.c., and miscellaneous industries .5 p.c. The following industry groups, all of which are classified in the non-durable goods sector, reported declines in the physical volume of production. The greatest decline of 8 p.c. was reported by the leather products group, followed by tobacco and tobacco products with 6 p.c., clothing 4 p.c., textiles 2 p.c. and printing, publishing and allied industries .3 per cent.

Manufacturing establishments reporting in 1951 numbered 37,021. Of these 822 were located in Newfoundland, 237 in Prince Edward Island, 1,474 in Nova Scotia, 1,084 in New Brunswick, 11,861 in Quebec, 13,025 in Ontario, 1,512 in Manitoba, 973 in Saskatchewan, 2,118 in Alberta, 3,897 in British Columbia and 18 in Yukon and Northwest Territories. These plants furnished employment to 1,258,375 persons who received \$3,276,280,917 in salaries and wages. They also produced goods with a selling value at the factory of \$16,392,187,132 and spent \$9,074,526,353 for materials, while the value added by manufacture totalled \$6,940,946,783. It should be remembered that the value added by manufacture does not represent the manufacturers' profits. The value added is obtained by subtracting the cost of materials, including fuel and electricity, from the value of products. The difference represents the value added to the materials by labour. It is this difference which the employer of labour uses to pay for the labour itself, the overhead expenses, interest and profits. Compared with the previous year, there was an increase of \$998,888,554 in the value added by manufacture.

Les industries manufacturières du Canada, en 1951, ont atteint un nouveau sommet quant à la valeur brute de la production. Celle-ci s'est établie, au total, à \$16,392,187,132, augmentation de 18.6 p.100 sur 1950, dont une partie est attribuable à l'accroissement d'environ 6 p.100 du volume physique de la production et le reste, à la hausse des produits entièrement et partiellement fabriqués. En même temps que la production, le nombre de personnes employées dans ces industries a augmenté de 6.3 p.100 et leur rémunération, de 18.2 p.100. La rémunération totale, \$3,276,280,917, était la plus élevée de l'histoire et surpassait de \$505,013,482 le sommet antérieur atteint en 1950.

La guerre de Corée n'a pas influé également sur tous les secteurs de la production manufacturière. La plus forte expansion s'est produite dans les industries du groupe des biens durables où, d'après les estimations provisoires, le volume physique de la production a augmenté de 10.4 p.100 au regard de 2.7 p.100 seulement dans celles des biens non durables. L'augmentation enregistrée dans l'industrie manufacturière dans son ensemble a été de 6.1 p.100, l'indice s'établissant à 242.1, soit .2 point seulement plus bas que le sommet du temps de guerre atteint en 1944.

Comme il fallait s'y attendre, les industries affectées à la production de défense ont enregistré les plus fortes avances en 1951. De même, la plupart des groupes d'industries de biens durables ont été plus actives, tandis que quelques-uns seulement dans les industries de biens non durables ont augmenté leur production, la majorité déclarant des diminutions. Le groupe de l'équipement de transport a enregistré la plus forte augmentation quant au volume physique de production, soit 20 p.100. Il est suivi des dérivés du pétrole et du charbon, 13 p.100, des produits du fer et de l'acier, 11 p.100, des produits des métaux non ferreux, 10 p.100, des produits des minéraux non métalliques, 9 p.100, des produits du papier, 8 p.100, des appareils et accessoires électriques, 7 p.100, des produits chimiques, 6 p.100, des produits du caoutchouc, 5 p.100, des aliments et boissons, 4 p.100, des produits du bois, 3 p.100, et des produits divers, .5 p.100. Les groupes suivants, qui font tous partie du secteur des biens non durables, ont accusé des diminutions quant au volume physique de la production: produits du cuir, 8 p.100 (la plus importante); tabac et produits, 6 p.100; vêtements, 4 p.100; textiles, 2 p.100; impression, édition et industries connexes, .3 p.100.

Les établissements manufacturiers qui ont fait rapport en 1951 se chiffraient par 37,021, dont 822 sont situés à Terre-Neuve, 237 dans l'Île-du-Prince-Édouard, 1,474 en Nouvelle-Écosse, 1,084 au Nouveau-Brunswick, 11,861 dans Québec, 13,025 en Ontario, 1,512 au Manitoba, 973 en Saskatchewan, 2,118 en Alberta, 3,897 en Colombie-Britannique et 18 au Yukon et dans les Territoires du Nord-Ouest. Ces établissements ont procuré de l'emploi à 1,258,375 personnes, qui ont reçu en salaires la somme de \$3,276,280,917. Ils ont aussi produit pour une valeur marchande à la fabrique de \$16,392,187,132 et dépensé en matières premières une somme de \$9,074,526,353, tandis que la valeur ajoutée par la fabrication s'est élevée à \$6,940,946,783. Il convient de remarquer que la valeur ajoutée par la fabrication ne représente pas les bénéfices des manufacturiers. On obtient cette valeur ajoutée en soustrayant le coût des matières premières, y compris le combustible et l'électricité, de la valeur des produits. La différence représente la valeur ajoutée aux matières premières par la main-d'œuvre, et c'est avec cette différence que l'employeur paie sa main-d'œuvre, ses frais généraux et ses intérêts et s'attribue des bénéfices. Au regard de l'année précédente, la valeur ajoutée par la fabrication a augmenté de \$998,888,554.

1. A change in the method of computing the number of wage-earners in the years 1925 to 1930 increased the number somewhat over that which the method otherwise used would have given. In 1931, however, the method in force prior to 1925 was re-adopted. The figures for 1931 and later years are, therefore, comparable with those for 1924 and earlier years. — Vu la modification apportée à la méthode de calcul de 1925 à 1930 le nombre d'employés à gages est plus élevé qu'il ne l'aurait été si l'on s'était servi de l'ancienne méthode. En 1931, toutefois, la méthode antérieure à 1925 a été réadoptée. Les chiffres de 1931 et des années suivantes sont donc comparables avec ceux de 1924 et des années précédentes.

2. In accordance with a resolution passed by the Conference of British Commonwealth Statisticians, 1935, the net value of production is now computed by subtracting the cost of fuel and electricity as well as the cost of materials from the gross value of the products. The figures for 1924 and later years have, therefore, been revised in accordance with this resolution. The revision could not be carried farther back as statistics for the cost of electricity are not available for years prior to 1924. — En vertu d'une résolution adoptée à la conférence des Statisticiens du Commonwealth britannique, en 1935, la valeur nette de production est maintenant calculée en soustrayant le coût des matières premières, plus le combustible et l'électricité de la valeur brute des produits. Les chiffres de 1924 et des années postérieures ont donc été révisés conformément à cette résolution. Les calculs ne peuvent remonter plus haut que 1924, les statistiques du coût de l'électricité n'existant pas antérieurement à cette date.

3. Includes Newfoundland with the exception of fish processing. — Comprend Terre-Neuve, à l'exclusion du conditionnement du poisson.

4. Fish processing in Newfoundland included. — Conditionnement du poisson à Terre-Neuve compris.

NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 4 volumes as follows: Volume I—The Primary Industries, including mining, forestry and fishing; Volume II—Manufacturing; Volume III—Construction; Volume IV—Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups.

- I—General Review of the Manufacturing Industries, \$1.50.
- II—The Manufacturing Industries, by Provinces (3 Sections, see below).
- III—Foods and Beverages
- IV—Tobacco and Tobacco Products
- V—Rubber Products
- VI—Leather Products
- VII—Textiles
- VIII—Wood and Paper Products
- IX—Printing Trades
- X—Iron and Steel Products
- XI—Transportation Equipment
- XII—Non-ferrous Metal Products
- XIII—Electrical Apparatus and Supplies
- XIV—Non-metallic Mineral Products
- XV—Products of Petroleum and Coal
- XVI—Chemicals and Allied Products
- XVII—Miscellaneous Manufactures

The present report belongs in Part II. It is punched to permit filing in a ring binder along with other reports of the group, the full list of which is as follows:

- Section 1. Principal Statistics of Major Industrial Groups and Leading Industries, 50¢.
- Section 2. Principal Statistics of Individual Industries, 75¢.
- Section 3. Principal Statistics by Regional Distribution, 75¢.

AVIS

Les rapports annuels préparés par la Division de l'industrie et du commerce du Bureau fédéral de la statistique sont répartis en quatre volumes: Volume I—Industries primaires, y compris mines, forêts et pêche; Volume II—Manufactures. Volume III—Construction; Volume IV—Commerce et services. Les volumes contiennent plusieurs parties, qui sont, à leur tour, subdivisées selon les industries dont elles se composent.

Le Volume II contient les parties suivantes, dont les deux premières traitent des industries manufacturières dans l'ensemble et les autres, des principaux groupes d'industries manufacturières.

- I—Revue générale des industries manufacturières, \$1.50.
- II—Industries manufacturières, par province (3 Sections—voir ci-dessous).
- III—Aliments et boissons
- IV—Tabac et produits du tabac
- V—Produits du caoutchouc
- VI—Produits du cuir
- VII—Textiles
- VIII—Produits du bois et du papier
- IX—Métiers de l'imprimerie
- X—Dérivés du fer et de l'acier

FOREWORD

Two major changes were adopted in 1949 in the compilation of statistics of manufactures. First, the compilations contain for the first time statistics for Newfoundland, and second, there was also a change in the system of classifying industries. Under the Standard Classification adopted in 1949, the industries are grouped into seventeen major groups as listed below;

1. Foods and beverages
2. Tobacco and tobacco products
3. Rubber products
4. Leather products
5. Textile products (except clothing)
6. Clothing (textile and fur)
7. Wood products
8. Paper products
9. Printing, publishing and allied industries
10. Iron and steel products
11. Transportation equipment
12. Non-ferrous metal products
13. Electrical apparatus and supplies
14. Non-metallic mineral products
15. Products of petroleum and coal
16. Chemicals and allied products
17. Miscellaneous manufacturing industries

The nine groups formerly used, were:

1. Vegetable products
2. Animal products
3. Textiles and textile products
4. Wood and paper products
5. Iron and its products
6. Non-ferrous metal products
7. Non-metallic mineral products
8. Chemicals and allied products
9. Miscellaneous industries

Some industries were broken down such as the electrical apparatus and supplies industry which now comprises five industries (a) batteries (b) heavy electrical machinery, (c) radios and radio parts, (d) refrigerators, vacuum cleaners and appliances and (e) miscellaneous electrical products. In some cases establishments were transferred from one industry to another in order to bring them in line with the new industries which were established. Where an industry was eliminated the establishments were transferred to one or several other industries, depending on the nature of the principal products manufactured. A check was also made of each establishment and many transfers were made where the major products of the establishment had materially changed during the past few years. All this makes it practically impossible to evaluate industry changes historically.

AVANT-PROPOS

Deux changements importants ont été apportés à la méthode de calcul de la statistique manufacturière en 1949. D'abord, et pour la première fois, les calculs tiennent compte des chiffres de Terre-Neuve et ensuite la méthode de classification des industries a été modifiée. D'après la nouvelle classification adoptée en 1949, les industries sont réparties entre dix-sept groupes principaux, comme suit:

1. Aliments et boissons
2. Tabac et produits du tabac
3. Produits du caoutchouc
4. Produits du cuir
5. Textiles (vêtements exceptés)
6. Vêtements (textile et fourrure)
7. Produits du bois
8. Produits du papier
9. Impression, édition et industries connexes
10. Produits du fer et de l'acier
11. Équipement de transport
12. Produits des métaux non ferreux
13. Appareils et fournitures électriques
14. Produits des minéraux non métalliques
15. Dérivés du pétrole et du charbon
16. Produits chimiques
17. Industries manufacturières diverses

Les neuf groupes autrefois employés, sont:

1. Substances végétales
2. Produits animaux
3. Textiles et tissus
4. Bois et papier
5. Fer et ses produits
6. Métaux non ferreux
7. Métalloïdes
8. Produits chimiques
9. Industries diverses

Certaines industries ont été subdivisées; par exemple, l'industrie des appareils et des fournitures électriques comprend maintenant cinq industries: a) accumulateurs, b) machinerie électrique lourde, c) radios et pièces, d) réfrigérateurs, aspirateurs et autres articles électriques, et e) articles électriques divers. Il a fallu, dans certains cas, transporter les établissements d'une industrie à une autre afin qu'ils soient en harmonie avec les industries nouvelles. Là où une industrie a été éliminée, les établissements ont été transportés à une ou plusieurs autres, selon la nature du principal produit fabriqué. Chaque établissement a aussi été vérifié et plusieurs transferts ont été effectués là où les principaux produits de l'établissement ont changé sensiblement au cours des quelques dernières années. En raison de tous ces changements, il est à peu près impossible d'évaluer les transformations qui se sont produites dans l'industrie au point de vue chronologique.

THE MANUFACTURING INDUSTRIES OF CANADA 1951

SECTION III GEOGRAPHICAL DISTRIBUTION

Published by Authority of
The Right Honourable C. D. Howe, Minister of Trade and Commerce

Price 75 cents

Vol. 2—Part II—Section 3

NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 4 volumes as follows: Volume I—The Primary Industries, including mining, forestry and fishing; Volume II—Manufacturing; Volume III—Construction; Volume IV—Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups.

- I—General Review of the Manufacturing Industries, \$1.50.
- II—The Manufacturing Industries, by Provinces (3 Sections, see below).
- III—Foods and Beverages
- IV—Tobacco and Tobacco Products
- V—Rubber Products
- VI—Leather Products
- VII—Textiles
- VIII—Wood and Paper Products
- IX—Printing Trades
- X—Iron and Steel Products
- XI—Transportation Equipment
- XII—Non-ferrous Metal Products
- XIII—Electrical Apparatus and Supplies
- XIV—Non-metallic Mineral Products
- XV—Products of Petroleum and Coal
- XVI—Chemicals and Allied Products
- XVII—Miscellaneous Manufactures

The present report belongs in Part II. It is punched to permit filing in a ring binder along with other reports of the group, the full list of which is as follows:

- Section 1. Principal Statistics of Major Industrial Groups and Leading Industries, 50¢.
- Section 2. Principal Statistics of Individual Industries, 75¢.
- Section 3. Principal Statistics by Regional Distribution, 75¢.

AVIS

Les rapports annuels préparés par la Division de l'industrie et du commerce du Bureau fédéral de la statistique sont répartis en quatre volumes: Volume I—Industries primaires, y compris mines, forêts et pêche; Volume II—Manufactures. Volume III—Construction; Volume IV—Commerce et services. Les volumes contiennent plusieurs parties, qui sont, à leur tour, subdivisées selon les industries dont elles se composent.

Le Volume II contient les parties suivantes, dont les deux premières traitent des industries manufacturières dans l'ensemble et les autres, des principaux groupes d'industries manufacturières.

- I—Revue générale des industries manufacturières, \$1.50.
- II—Industries manufacturières, par province (3 Sections—voir ci-dessous).
- III—Aliments et boissons
- IV—Tabac et produits du tabac
- V—Produits du caoutchouc
- VI—Produits du cuir
- VII—Textiles
- VIII—Produits du bois et du papier
- IX—Métiers de l'imprimerie
- X—Dérivés du fer et de l'acier
- XI—Équipement de transport
- XII—Dérivés des métaux non ferreux
- XIII—Appareils et fournitures électriques
- XIV—Dérivés des non-métalliques
- XV—Produits du pétrole et du charbon
- XVI—Produits chimiques et parachimiques
- XVII—Industries manufacturières diverses

Le présent rapport tombe dans la partie II. Il est perforé de façon qu'on puisse l'insérer dans un relieur à anneaux avec les autres rapports du groupe, dont voici la liste complète:

- Section 1. Principales statistiques des grands groupes d'industries et des industries les plus importantes, 50¢.
- Section 2. Principales statistiques de chaque industrie, 75¢.
- Section 3. Statistiques principales selon la répartition régionale, 75¢.

NOTE. — 1951 REFERENCE MAPS

The Ninth (1951) CENSUS of Canada has prepared a report which provides a series of reference maps for the 1951 Census. A map is provided for each of the ten provinces of Canada, outlining the boundaries of the counties, or census divisions, as the case may be.

The maps for all provinces except Quebec and Ontario show the various subdivisions of the counties or census divisions. For the Prairie Provinces, the maps outline the boundaries of the municipal units, and, in addition, the lines of the smaller subdivisions indicate the townships. Because of the small scale of these provincial maps, it is not possible to outline the subdivisions of the counties in the Provinces of Quebec and Ontario. If these are required other map sources should be consulted.

This bulletin also contains maps showing the municipalities, or parts thereof, included in each of the census metropolitan areas. As in the provincial series, these maps are not drawn to a uniform scale, and are restricted to principal features of outline only. Their main use is as a guide to locations and to show the broad geographical relationships of the areas involved.

A request for this bulletin may be made to the Bureau of Statistics, Information Services Division — Publications Distribution Unit, asking for 1951 Census BULLETIN 1-A, Volume 1, Appendix A.

1. Not collected.

2. A change in the method of computing the number of wage-earners in the years 1925 to 1930, inclusive, increased the number somewhat over that which the method otherwise used would have given. In 1931, however, the method in force prior to 1925 was re-adopted. The figures for 1931 and later years are, therefore, comparable with those for 1924 and earlier years.

3. In accordance with a resolution passed by the Conference of British Commonwealth Statisticians, 1935, the net value of production is now computed by subtracting the cost of fuel and electricity as well as the cost of materials from the gross value of the products. The figures for 1924 and later years, have, therefore, been revised in accordance with this resolution. The revision could not be carried farther back as statistics for the cost of electricity are not available for years prior to 1924.

4. Includes Newfoundland.
